Teamwork, Communication, and

Problem-solving.

EXPERIENCE

Front-end Developer (Business Solutions)
July 2022 - 2024

- Created and implemented responsive UI designs using Vue.js, Angular, Bootstrap, and other front-end frameworks.
- Integrated APIs and external data sources into Vue.js applications to enhance functionality and user experience.
- Design implementation using CSS, SASS and bootstrap framework.
- Utilized Git and version control to manage codebase and track changes.
- Experience in UI/UX design and creating visually appealing, intuitive user interfaces.
- HTML/CSS: A solid foundation in HTML and CSS, and the ability to create responsive, pixel-perfect web designs.
- Experience with debugging tools such as Chrome DevTools and Firefox Developer Edition.
- Familiarity with web performance optimization techniques, including lazy loading and caching.
- Utilized the DOM to create interactive and dynamic web applications.

Human Resources System UCR
August 2021-2022

- Developed a web-based human resources software application using PHP, MySQL, and JavaScript.
- Designed and implemented database schema and data models using MySQL.
- Provided technical support to end-users and resolved technical issues related to the software.
